

IS OUR RELATIONSHIP HEALTHY?

Take our quiz to find out!

ASK YOURSELF - "IS THIS RELATIONSHIP GOOD FOR ME?"

Have you ever been in a relationship with a friend or significant other (someone who is your boyfriend, girlfriend, friend with benefits, partner, etc.) that didn't always feel right?

Our relationships can be fun, exciting, and rewarding, but sometimes they can become unhealthy. And you always deserve respect and to be safe. Our relationships can be tough to navigate, so we made you a Road Map to Healthier Relationships. And some places to get help if you're in an unhealthy zone.

When we hear the word "relationship," we often think of romantic relationships, but we also have relationships with our friends, family, teachers, coaches, and co-workers. Relationships are a big part of your life so it's important they're healthy ones!

Do the quiz to help you see the signs of a healthy vs. unhealthy relationship so that you can know when to work on it or leave it. Step one: remember that working through the bumpy parts of relationships may be hard and awkward, but it is part of taking care of yourself. It's important to remember that an unhealthy relationship can happen to people of any gender, race, age, and sexual orientation.

WHERE YOU ARE GOING?

Romeo & Juliet was not a love story. It was a relationship between a 13yro and a 17yro that lasted three days and resulted in six deaths.

WHAT DOES IT LOOK AND FEEL LIKE WHEN MY RELATIONSHIPS ARE 'HEALTHY'?

This answer changes depending on who you ask, but in general both of you...

- feel good about your relationship and don't put each other down;
- have your own likes and dislikes alongside your similarities;
- can talk about your wants and needs in ways that do not hurt each other;
- have fun with each other and with other people, you don't prevent each other from having other friends;
- are good to each other, not hurting one another purposefully, either physically or emotionally;
- feel comfortable and safe with each other.
- have fully and freely given consent to what is happening...

WAIT - WHAT IS CONSENT?

Giving "consent" is when you agree, by your own choice and not out of fear, pressure, or guilt, to participate in sexual activities like penetrative or oral sex, foreplay, and even kissing! If someone does not give consent, for example they say "no", or do not answer, or have taken drugs/drinking, if the sexual activities are continued it is assault which is a serious crime. It is important to remember that even if you said YES in the beginning, you and the other person can say NO / STOP at any point.

HEALTHY RELATIONSHIP!

Both of you are putting time and effort into it. You are a team.

POTENTIALLY IN AN UNHEALTHY ZONE.

You may not be okay with the answers. Your next step is reaching out for help or more information. You are not alone in this. Maps to help are below.

Some of the items above are unhealthy behaviours, but some are against the law.

Relationships generally start as healthy and can shift into something else. While it can be hard to think of or come to admit that someone you care about is not treating you with respect, you always deserve respect from the people around you. When you are being hurt in a relationship it is time to leave, even if a bad situation happened only one time. And it is okay, to not go back.

WARNING: MAJOR RISK AHEAD

If you are in an unhealthy relationship, it could take a turn toward abuse. Abuse can happen multiple times in multiple ways, but a single incident of assault (an attack) is also considered abuse. However, abuse does not only mean physical violence:

- Sometimes you can see it – being hit, slapped or pushed around;
- But it can also leave no physical marks; abuse can be emotional, verbal and psychological, this includes but isn't limited to, insulting someone, stalking or controlling them;
- Abuse includes making you or the other person feel scared or worthless;
- Abuse can include forcing someone into sexual behaviour against their will.

OUR ROMANTIC RELATIONSHIPS AND FRIENDSHIPS START SOMEWHERE.

Here are some safety tips for becoming involved in both! You can look online for more as well.

- Be assertive in what you are and are not comfortable with. Be aware of your surroundings.
- Keep safe and meet in public places for the first few dates or double date! Restaurants, the movies, or a park, are all great date ideas. Stay safe, even if you already know this person through school or a friend.
- Let someone you trust know where you are going and when you expect to return.

- Have a backup plan to get home: if you have a phone, make sure it is charged. Have your own money in case you need to take a bus or taxi (310-TAXI) quickly. Have a friend, parent or someone you trust on standby to pick you up. Or, consider using an app for a ride service that is attached to a bank or credit card.
- While we are not responsible for the actions of others, keeping our drinks in our hands and being aware of how much we are drinking are wise things to do.
- Use your smarts! If something doesn't feel right, always trust your instincts.

REMEMBER

If you are in an unhealthy/abusive relationship, you can still be having fun and feel happy sometimes. Imagine a roller coaster; ultimate highs followed by equally intense lows often happening in a repeating cycle.

The other person's words and actions are not your fault. Their words and actions are their responsibility and choice. They are most probably not showing everyone this harmful side of their personality, you are the one experiencing the behavior. Your experience is valid.
